

TWIST

Redefining the Gold Standard in Microneedling

THE MOST COMFORTABLE
MICRONEEDLING EXPERIENCE

 MADE IN GERMANY

 Licensed by Health Canada

Introducing revolutionary SilkTouch™ & Active Needle Retrieval™ technologies to provide exceptional results at unparalleled comfort and safety.

Why Choose TWIST?

Engineered with the client and practitioner in mind to offer the best microneedling treatment for results, comfort, and safety.

ACTIVE NEEDLE RETRIEVAL (ANR)[™] TECHNOLOGY

TWIST is the only microneedling system that uses its motor to actively retrieve needles from the skin, guaranteeing maximum comfort and precision at every needle length.

SILKTOUCH[™] NEEDLING TECHNOLOGY

Dramatically reduces the time needles spend inside the skin, thus minimizing nerve innervations and discomfort.

HIGHEST QUALITY NEEDLES

Designed for the most precise treatments, every TWIST needle is made of the highest quality surgical-grade stainless steel and is meticulously crafted to ensure 360° symmetry that prevents unnecessary trauma to the skin.

MOST POWERFUL MOTOR ON THE MARKET

At 150 strokes per second, the TWIST delivers optimal results and eliminates reckless tearing of the skin imposed by slower devices. Even at its highest stroke frequency the needles can safely treat the toughest scars on any part of the body with ease, reducing pain and stress trauma to a minimum.

ERGONOMIC DESIGN

A one-of-a-kind ergonomic and balanced handpiece for higher treatment accuracy and fatigue-free operation. The motor is designed and positioned to reduce vibrations, with the center of gravity located in direct proximity to the middle of your palm, so your hand and the device remain stable and comfortable during treatment.

FULL POWER 24/7

As opposed to battery-operated devices, the TWIST is connected directly to the power grid, ensuring consistent power output and maximum performance at every step of the treatment.

SAFEST DEVICE ON THE MARKET

Anti-flowback valves within each needle cartridge, foot-switch operation, and enhanced disinfection protocols eliminate the risk of cross-contamination and guarantee perfectly safe treatments.

CERTIFIED MEDICAL-GRADE EQUIPMENT

The TWIST is ISO 13485 and MDSAP certified, CE marked, and licensed by Health Canada as a class II medical device, meeting the highest standards for medical-grade equipment in manufacturing, materials, product sterility and more.

0 - 2.5MM ACTIVE NEEDLE HUB

Active needle length from 0 to 2.5mm that can be adjusted in the handpiece. Each needle cartridge has 6 precisely ground needles made of surgical-grade stainless steel. Sterile and single use.

BUILT TO LAST

Designed & manufactured in Germany, the TWIST is extremely robust, durable, smooth, and precise.

A Breakthrough in Microneedling Technology

Introducing the ANR[™] & SilkTouch[™] Technologies, which together provide the most comfortable and precise microneedling experience.

ACTIVE NEEDLE RETRIEVAL (ANR)[™] TECHNOLOGY

TWIST is the only microneedling system equipped with ANR[™] Technology, an advanced system that actively retrieves the needles from the skin, rather than relying on passive, spring-based retrieval which is used by other devices. This allows for the most precise and comfortable treatments.

BENEFITS OF ANR[™] TECHNOLOGY

- 1 Minimal discomfort during treatments; many clients report that even numbing cream is not necessary!
- 2 Much more precise micro-channels in the skin
- 3 No skin pulling or needles that get stuck in the skin, even when treating thick burn scars.

SILKTOUCH[™] NEEDLING TECHNOLOGY

TWIST SilkTouch[™] Needling Technology minimizes the time needles spend inside the skin, therefore minimizing sensory nerve stimulations. This results in the most comfortable microneedling therapy on the market.

BENEFITS OF SILKTOUCH[™] TECHNOLOGY

- 1 Enhanced comfort
- 2 Minimal risk of side effects
- 3 Faster healing

Bring Skin Back To Life

Effectively treat a wide range of skin conditions with 3 Professional Treatment Kits:

CIT HYAL

Classic Collagen Induction Therapy

IDEAL FOR:

- Scars
- Stretch Marks
- Wrinkles
- Texture

HAIR & SCALP SOLUTION

Restores healthy hair structure and density for men & women.

IDEAL FOR:

- Androgenetic Alopecia (Male/Female pattern baldness)
- Alopecia Areata (patchy baldness)
- Telogen Effluvium (stress-induced hair loss)

PIGMENT CORRECTION

An effective pigment correction treatment for all skin tones.

IDEAL FOR:

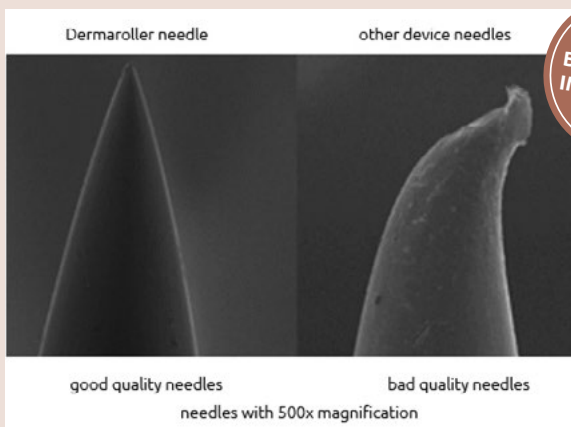

- Uneven Skin Tone
- Melasma
- Lentigines (Sun Spots)
- Post-Inflammatory Hyperpigmentation (PIH)

The Original Gold Standard in Microneedling

Brought to you by THE ORIGINAL DERMAROLLER®, the TWIST is designed and manufactured in Germany in full compliance with the highest standards for medical equipment.

By investing in a Dermaroller® product, you are guaranteed:

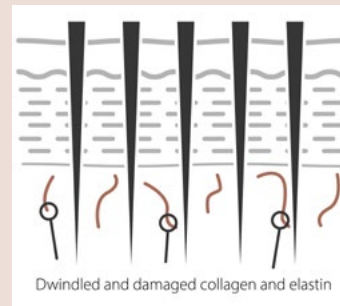

- An unmatched microneedling experience that yields the best possible results with minimal discomfort
- Uncompromising quality in professional and home-care products
- Only the highest quality, certified medical-grade equipment that is designed and manufactured in Germany

BEWARE OF IMITATIONS

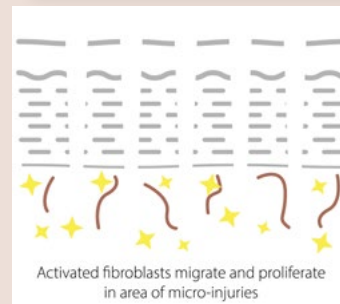

Each Dermaroller® needle undergoes a rigorous 7-step production process to ensure 360° symmetry.

How It Works

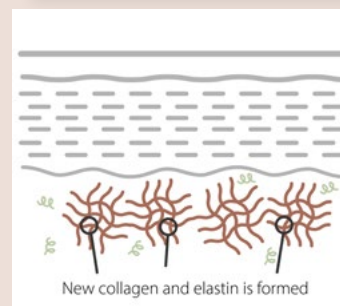

TREATMENT

During treatment, surgical-grade, non-traumatic microneedles perforate the skin rapidly and precisely, creating on average more than a million micro-channels per treatment that stimulate the skin's natural non-emergency healing response.

CORRECTIVE HEALING

Controlled damage instructs the skin to heal slowly and correctively. Activated fibroblasts proliferate in the area to fill the wounds with new deposits of collagen & elastin without developing any scars. At the same time, the micro-wounds are drenched with corrective hydrating ingredients that expedite healing and improve end results.

HEALTHIER SKIN

After healing, the affected skin is completely renewed with improved structure, firmness and elasticity. Cellular functions are restored and skin cells are reset to their healthy mode of operation, leaving your clients with healthier and better looking skin.

The Results Speak For Themselves

Everything you Need in a Microneedling System

UNMATCHED QUALITY

- Fully certified medical-grade equipment
- Made in Germany by the Original Dermaroller®
- Licensed by Health Canada
- Non-traumatic, surgical-grade stainless steel needles
- Maximum precision with every stroke

SUPERIOR TECHNOLOGY

- Fastest device on the market - up to 150 strokes per second
- Corded handpiece for consistent, dependable power
- Active Needle Retrieval (ANR™) Technology
- SilkTouch™ Technology
- Adjustable needle length 0 - 2.5mm

MADE FOR CONVENIENCE

- Small and mobile
- Intuitive and user-friendly
- Ergonomic handpiece
- Minimal discomfort during treatments
- No skin tearing or bruising
- Dedicated treatment serums and skincare products available

ULTIMATE VERSATILITY

- Safe for all skin types
- Single device offers effective solutions to a wide range of skin conditions, including:
 - Scars on the face and body, including burns
 - Stretch marks
 - Fine lines and wrinkles
 - Pigmentation
 - Hair loss
 - And much more!
